

Andrea MORÚA BRAVO

ITI Student

 Andrea Morua  Andreamoruaa
 andreamoruaa@gmail.com  (52) 444 418 6531

I am a student of Information Technology Engineering at the Universidad Politécnica de San Luis Potosí (UPSLP), with a strong foundation in structured and object-oriented programming. I have experience working with languages such as C, C++, Java, Python, and Ruby, as well as web development using HTML, CSS, PHP, and SQL.

I have knowledge of operating systems, particularly Linux environments, and I am currently expanding my skills in areas such as networking and cybersecurity. Additionally, I have a solid understanding of computer hardware, digital systems, and computer architecture.

I am especially interested in specializing in cybersecurity and machine learning, where I am to develop innovative and high-impact solutions. I consider myself a proactive, results-oriented individual with a strong desire to continuously learn and apply my knowledge in real-world technology projects.

EDUCATION

Information Technology Engineering, Polytechnic University(UPSLP), San Luis Potosí, San Luis Potosí, México - On-site **Aug 2023 - Present**

- I developed a web-based laboratory reservation system for my university, integrating a functional database and a user-friendly interface.
- Active member of the university's Competitive Programming team, participating in contests and activities focused on algorithmic thinking and problem-solving skills.
- Active member of the university's cybersecurity club, participating in competitions, activities, exams, and courses focused on developing practical cybersecurity skills.

RELEVANT COURSEWORK

August 2024 Introduction to IoT, Cisco, Online

Explored the fundamentals of the Internet of Things (IoT), including its role in digital transformation in various industries.

April 2025 IT Essentials 8, Cisco, Online

Acquired foundational knowledge in computer hardware and software, including assembly, installation of operating systems, and troubleshooting. Gained practical experience with networking concepts, IT security, and mobile devices.

November 2025 Networking Basics, Cisco, Online

Gained fundamental knowledge of networking concepts, including network types, protocols, and models such as OSI and TCP/IP. Learned how data is transmitted across networks and developed basic skills in network configuration and troubleshooting.

January 2026 Introduction to Cybersecurity, Cisco, Online

Developed a foundational understanding of cybersecurity principles, including common threats, vulnerabilities, and attack vectors.

January 2026 Python Essentials 1 and 2, Cisco, Online

Acquired strong programming skills in Python, including data types, control structures, functions, and object-oriented programming.

At present Linux Fundamentals, Cisco, Online

Learned essential Linux concepts, including file system navigation, command-line usage, and system administration basics.

At present CCNA: Switching, Routing, and Wireless Essentials, Cisco, Online

Developed intermediate networking skills, including configuring switches and routers, VLANs, and inter-VLAN routing.
